

BEDROCK'S SINGLE POINT OF ACCESS TO DIGITAL FINANCE

OrchardWay P2P Credit Fund Ltd ("OrchardWay" or the "Fund") is a feeder fund of HCG Digital Finance LP ("the Master Fund"), investing over 90% of its assets in the Master Fund (with the remaining assets typically being kept as cash for the FX margin). The Fund is for non-U.S. investors and provides access to the investment expertise of HCG Fund Management LP ("HCG"), a firm at the forefront of digital finance investing that is led by Hadi Habal and Jose Penabad. HCG has an extensive track record, and the Fund offers Professional Investors exposure to a diversified pool of underlying borrowers across multiple sectors which were until now reserved for banks, specialist finance institutions, or niche investors. HCG investment professionals have a long-term focus on performance assessment over three dimensions: return, risk, and time. It favours quality over quantity of loan originators, and quality over yield when selecting underlying credits.

HCG DIGITAL FINANCE LP (THE MASTER FUND)

HCG launched HCG Digital Finance LP (the "Partnership") in 2015. The Partnership is HCG's second investment program following HCG Consumer Credit I LP ("HCG CCI"), launched in March 2013.

The Fund's investment objectives are to deliver consistent capital growth and absolute returns over the long-term risk premium.

The Partnership relies on HCG's deep, data-driven financial and domain expertise (built through research, exhaustive due diligence, and active loan selection combined with leading-edge technology and engineering) to power the investment process. HCG developed its multi-phased approach to investing in loans across the following sectors: consumer credit, residential real-estate, small business, skill-based student credit, and litigation finance. Partnership features are:

- a focus on prime loans held until maturity and that exhibit low correlation to most traditional listed securities
- continuous reinvestment of paid-off and amortized principal, depending on prevailing credit conditions
- accrual of a loan loss reserve for future charge-offs
- asset-based leverage capped at 2x debt-to-equity
- duration of 1.0-1.5
- targeted annual net return on equity of 9% - 12% at 1-2x leverage, and 6% - 9% at < 1x leverage

HCG is capitalising on the digital finance opportunity by integrating investment analysis, active selection, risk management and engineering disciplines.
